

## Xenbase Survey

### 1. How should *Xenopus* nomenclature distinguish between proteins and genes?

€ All lower-case for genes, first letter capitalized for proteins.

e.g. gene: pax8 protein: Pax8

€ Italicize gene names, not italics for proteins.

e.g. gene: *pax8* protein: pax8

### 2. Which of the following options best describes how often you use Xenbase?

€ Daily

€ Weekly

€ Monthly

€ A few times a year

€ Never

### 3. The following are some of our near term options for new Xenbase features. Please indicate the priority you think we should place on each of these items on a scale of 1 to 7.

Gene expression search

Low 1 2 3 4 5 6 7 High

EST information tab for the gene page

Low 1 2 3 4 5 6 7 High

Protein function information tab for the gene page

Low 1 2 3 4 5 6 7 High

Community updateable Wiki

Low 1 2 3 4 5 6 7 High

Community submission for gene expression images

Low 1 2 3 4 5 6 7 High

Support for A and B variants of *X. laevis* genes

Low 1 2 3 4 5 6 7 High

**4. Are there any other new features that you believe should be prioritized for development?**

**5. Do you have any other suggestions/comments about Xenbase?**
